

PROJECT 1

The Big Switch

DESCRIPTION

Using all of the CSS transitions and animation skills that you have, build a big, shiny switch that toggles on and off. Have the switch do something interesting to the page when it is done moving into place. Keep it simple and make it fun.

INSTRUCTIONS

1. Build a simple HTML page that uses a few elements that could be used to build a toggle switch.
2. Style the switch using CSS so that it looks convincing.
3. Incorporate some sort of CSS transform, transition effect or a simple CSS animation to some part of the switch.
4. Employ one or more jQuery effects to some aspect of the user interface.
5. Have fun.

SUBMITTING YOUR WORK

Please upload your user interface/page to a live web server and submit the URL to the project on Blackboard. *Only submissions on a server will be accepted.*

EVALUATION

Please refer to the evaluation criteria (assessment rubric) below. This assignment is weighted in accordance with your course syllabus.

Criteria	Mark
TECHNICAL EVALUATION	0-5
Good coding practices have been adhered to (formatting, commenting, separation of CSS/HTML/JS, validation, etc.)	
CSS transforms, transitions, and/or animations have been effectively applied.	
jQuery effects have been incorporated in an interesting way.	
The switch is visually engaging and fun to use.	
Effort to implement some other creative aspect of the project is evident.	
Effort to implement some other technical aspect of the project is evident.	
Total	/30
